DETAILED ACTION

Claim Objections

Claims 2-8 are objected to because of the following informalities:

Claims 2 and 6, the recitation of “add” in line 2 should be -- odd --;

Claims 3-7 do not have proper punctuation, i.e. the claims must end with a period; and

Claim 8, the recitation of “tube sheets” in line 3 is inconsistent with “tubesheets” in line 4.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 3, it is not clearly understood what the “even row is mirrored” with respect to.

Regarding claim 4, it is not clearly understood what the radius is “bigger” with respect to.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3753

Claims 1-3 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Holman. Regarding claim 2, Figure 2 of Holman discloses staggered odd and even rows of tubes 24. Regarding claim 3, each even row of tubes 24 of Holman is identical and is read as "mirrored."

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Bernstein et al.

Claim 8 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Schneible or Lanzoni.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Holman in view of Brown.

Holman discloses all the claimed limitations except parts of tubes nearer the sidewalls having a bigger radius than farther tubes.

Brown discloses a heat exchanger comprising a vessel 21 with opposed tube sheets 29, 30 connected to bent tubing 10 having straight tube parts and 180 degree bends and having parts nearer to the vessel sidewall with a bigger radius than farther tubes for the purpose of increasing the tube bundle density within the vessel to increase heat exchange.

Art Unit: 3753

Since Holman and Brown are both from the same field of endeavor and/or analogous art, the purpose disclosed by Brown would have been recognized in the pertinent art of Holman.

It would have been obvious at the time the invention was made to a person having ordinary skill in the art to employ in Holman tube parts nearer to the vessel sidewall with a bigger radius than farther tubes for the purpose of increasing the tube bundle density within the vessel to increase heat exchange as recognized by Brown.

Regarding claim 6, as noted above, Figure 2 of Holman discloses staggered odd and even rows of tubes 24.

Conclusion

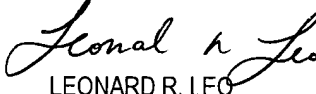

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
